Aug 2018

Alpha Through Analysis®

Aggregated Separate Accounts

Benchmark 1 (BM1): Barclays US Aggregate Bond ETF (Barc Agg/Barc/Agg) (AGG)

Benchmark 2 (BM2): Barclays US Securitized Total Return Index Unhedged MBS/ABS/CMBS (Barc MBS)

Benchmark 3 (BM3): Barclays US Corp High Yield Total Return Index (Barc HY)

Benchmark 4 (BM4): S&P 500 ETF (SPY)

MBS Mantra (MBSM) seeks to achieve superior returns with maximal Alpha and minimal Beta by investing in Income producing MBS. Our research and focus on understanding the returns of MBS has led to the conclusion that the majority of excess investment returns (Alpha) in MBS derive from current cashflow income returns and not from price change. MBS Mantra uses its proprietary analytical methodology, strategies, and a comprehensive understanding of MBS structures and markets, macro economics, money flows, and benchmarks, developed over 25+ years (see www.mbsmantrallc.com/analysis), to identify mispricings in sectors and securities, and to construct income producing portfolios with lower-than-market volatility.

MBS Mantra systematically process securities in the marketplace to identify bonds that can generate excess returns and Income. The high income of resulting portfolios dampens volatility from price changes, and also reduces duration and correlation risk. Portfolios and strategies are customized to meet the investment needs of clients.

For the flagship unlevered MBS High Income/Absolute Return Strategy described here, the portfolio is concentrated in the highest conviction strategies in Non-Agency RMBS and MBS derivatives, with diversification through both the number of bonds owned, and number of sub-strategies invested in.

Performance - MBS Mantra - MBS High Income/Absolute Return Strategy

Net Monthly Total Returns (Fees simulated)

Standard Deviation - Measures the degree of variation of returns around the mean (average) return. Standard Deviation is often used as a measure of Investment risk.

Sharpe Ratio - Measures the excess return (or risk premium) per unit of deviation in an investment asset or a trading strategy (using 0.75% risk free rate)

Alpha - The Alpha statistic is the difference between a Manager's return and the Benchmark's return, adjusted by the Manager's exposure to the Benchmark's risk. Alpha is typically used to measure the Managers investment skill relative to the Benchmark. A positive alpha indicates that the Manager has produced risk adjusted returns that exceed the benchmark's return. Annualized Alpha is the measure of the annualized value added.

Beta - A way to measure the "risk" or price volatility of a particular stock or fund as it compares to the market as a whole. A beta of 1.0 indicates that a security's risk measurement is on par with the market. A beta of 1.20 indicates that a security is 20% more volatile than the market, while a beta of 0.80 indicates that a security is 20% less volatile than the market.

R - Correlation (R) measures the extent of linear association of two variables.

R-Squared - A measure of how much of a fund's past returns can be explained by the returns from the market in general, as measured by a given index. If a fund's total returns were precisely synchronized with an index's returns, its R-squared would be 1. If a fund's returns bore no relationship to the index's returns, its R-square would be 0.

Past performance is not indicative of future results.

The performance returns and statistical data are estimates computed by the manager, based on unaudited figures. The figures above are indicative performance figures for the MBS Portfolio as a whole, and are not specific to your account. Actual performance for your account will be provided to you in your quarterly account statement. Actual performance will vary for investments made in different fee classes, or at different times of the year. The Portfolio returns methodology has been verified by S&Z Fund Services LLC.

Please Note: As indicated above, past performance may not be indicative of future results. Therefore, no current or prospective investor should assume that future performance will be profitable, or equal either the past performance results reflected or any corresponding historical index.

Benchmarks

The Bloomberg Barclays US Aggregate Bond Total Return Index (Barclays Agg) - A broad-based flagship benchmark that measures the Total Return of the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS (agency and non-agency).

The Bloomberg Barclays US Securitized Total Return Index (Barclays MBS) -represents the Total Return of the Securitized section of the Barclays US Aggregate. This includes MBS, ABS, CMBS and Covered bonds, and is unhedged.

The Bloomberg Barclays US Corporate High Yield Total Return Index (Barclays HY) -represents the Total Return of the The Bloomberg Barclays US Corporate High Yield Bond Index. This measures the USD-denominated, high yield, fixed-rate corporate bond market. Securities are classified as high yield if the middle rating of Moody's, Fitch and S&P is Ba1/BB+/BB+ or below. Bonds from issuers with an emerging markets country of risk, based on Barclays EM country definition, are excluded.

The S&P 500 Index Total Return - The 500 stocks in this index are selected by Standard and Poor's selection committee and are based on industry representation, liquidity, and company stability and assumes that any cash distributions, such as dividends, are reinvested back into the index. The stocks in the S&P 500 are not the 500 largest companies in the united states, but is an index designed to capture the returns of many different sectors of the U.S. economy. The index consists of approximately 400 industrial firms, 40 utility companies, and 20 transportation companies. This index is market capitalization weighted.

Disclosures:

This overview is being provided to you by MBS Mantra, LLC ("MBS Mantra" or the "Firm" or the "Adviser"), for informational purposes only, on a confidential basis and is intended solely for use by the company or individual to whom it is being delivered. Potential investors are advised to request and carefully read and review MBS Mantra's Firm Brochure (Form ADV Part 2), and other documents, if any, provided by MBS Mantra (the "Documents").

Under no circumstances should this overview be used or considered as an offer to sell, or a solicitation of any offer to buy, interests in any securities, funds, other financial products or investment strategies managed by MBS Mantra, nor shall it or its distribution form the basis of, or be relied upon in connection with, any contract for advisory services or otherwise.

The information contained with this brochure has not been audited and is based upon estimates and assumptions. No reliance should be placed, for any purpose, on the information or opinions contained in this overview. The information contained in this brochure is based upon proprietary information of MBS Mantra and public information, but it may not be comprehensive, and it should not be interpreted as investment advice. No representation, warranty or undertaking, express or implied, is given as to the accuracy or completeness of the information or opinions contained in this overview by MBS Mantra or by its affiliates and any of their principals, members, managers, directors, officers, employees, contractors or representatives.

Investors must make their own investment decisions based on their specific investment objectives and financial position. Charts, tables and graphs contained in this overview or in the Documents are not intended to be used to assist an investor in determining which securities to buy or sell or when to buy or sell securities. While this overview may contain past performance data, PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS, WHICH MAY VARY. There can be no assurance that any investment strategy will achieve its investment objective or avoid substantial or total losses. Except as required by law, MBS Mantra assumes no responsibility for the accuracy and completeness of any forward-looking statements. Further, MBS Mantra does not provide legal and tax advice; MBS Mantra recommends that investors consult with their own independent tax and legal advisers.

Any example represents an actual trade made by Samir Shah, MBS Mantra's principal, and/or MBS Mantra; any hypothetical represents a possible trade. None of the examples, whether actual or hypothetical, contained in this overview and the Documents should be viewed as representative of all trades made by MBS Mantra, but only as examples of the types of trades MBS Mantra expects to complete for its customers. None of the examples provided can in and of themselves be used to determine which securities to buy or sell, or when to buy or sell them. It should not be assumed that recommendations made in the future will be profitable or will equal the performance of the securities used as examples in these Documents. To the extent that this document contains statements about the future, such statements are forward looking and subject to a number of risks and uncertainties, including, but not limited to, the impact of competitive products, product demand and market risks, fluctuations in operating results and other risks. (A complete list of trades made by Samir Shah and/or MBS Mantra is available upon request.)

This overview and all Documents provided by MBS Mantra should only be considered current as of the date of publication without regard to the date on which you may receive or access the information. MBS Mantra maintains the right to delete or modify the information without prior notice; MBS Mantra undertakes no obligation to update such information, including, but not limited to, any forward-looking statements, as of a more recent date, except as otherwise required by law.
