**TM-RenewableEnergy Division** works with organizations/Companies large and small to expand the distribution of clean energy economy. Together, we can accelerate the movement of renewable energy and energy-efficient solutions into practical applications.

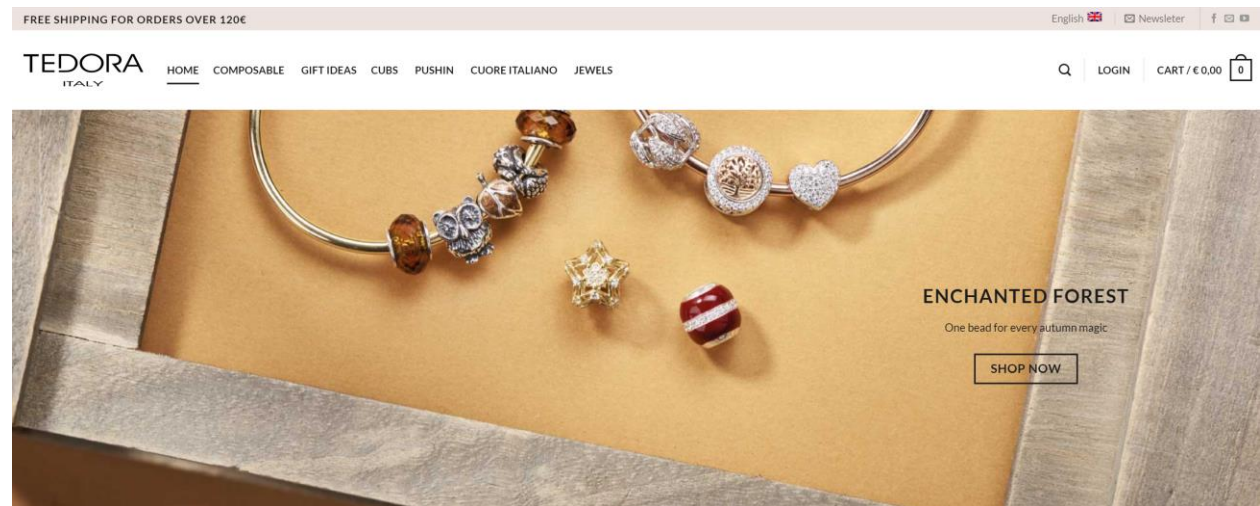

**TM-Shopping Division** connects our clients' products and services with people who are shopping for quality products and services – this platform makes it possible for dreams come true. **TM-Shopping** helps you find great deals and exclusive offers. We've developed a powerful online shopping solution: A website that shows you the best deals by introducing innovated concepts such as TM-Bidding, TM-CommunitySale and TM-ExclusiveDeals all in unique categorized TM-MiniMarts.

**TM-TEDORA** is the agent for an Italian company in the fashion jewelry sector, to gradually develop a network of shop in the shop and franchising boutiques, covering the whole MENA area. Together with TEDORA we're currently completing new collections, going beyond fashion jewelry, and including Arabic designs as well.

**TM-eTender Division** provides a platform and a bid management tools that provides up to date information about all type of Tenders, Requisitions and reverse auction. Also buyers will be able to screen a list of categorized companies according to their needs and interests.

TM-eTender allows Buyers to enjoy benefits over traditional manual Sourcing process, the digital process is faster and allows supplier competition which leads to cost saving, all this is done on the cloud with no additional IT efforts. Our eSourcing tool has integrated features like Supplier Discovery, eRFQ, eRFI, eTender, eAuction and host of intelligent smart features which brings overall efficiency to the sourcing process.

TM-eTender helps companies right from new supplier discovery to eAuctions and the progress is tracked and measured for internal transparency and audit statutory requirements.

- Discovery New potential Suppliers from database
- Ready to use eRFQ & eRFI templates
- Create eAuction for supplier competition
- Measure estimated savings
- Centralize eSourcing knowledge
- Reduce sourcing cycle and discovery best market price
- Manage multiple sourcing project with ease, multi-user capability
- Generate PDF & Excel reports for internal and external Audit requirements
