E-mail: Keith.Shelly@FSResidential.com

## Emergency Preparedness Plan

Updated: May 2022

### **INTRODUCTION AND PURPOSE**

The purpose of this Emergency Preparedness Plan is to provide The Forest residents, The Forest Country Club management, and all employees of The Forest Property Owners' Association (FPOA) and The Forest Country Club with information pertaining to increase awareness of local hurricane evacuation, shelter information, time frame for implementation, and the desired outcome to be achieved through the planning process.

The Forest Property Owners' Association (FPOA) and The Forest Country Club have devised this plan with the intention of protecting property, informing all within the community of an approaching disaster, and providing information as to the recommended steps to take during a disaster. You must stay informed during a disaster, and if told to evacuate by authorities you should do so for your safety.

**THE INFORMATION PROVIDED IS TO BE USED AT YOUR SOLE RISK. NEITHER THE FOREST PROPERTY OWNER'S ASSOCIATION, THE FOREST COUNTRY CLUB, ITS' DIRECTORS OR EMPLOYEES WARRANT THAT THIS INFORMATION WILL BE UNINTERRUPTED OR ERROR FREE: NOR DO THEY MAKE ANY WARRANTY AS TO THE RESULTS THAT MAY BE OBTAINED FROM USE OF THIS INFORMATION, OR AS TO THE ACCURACY OR RELIABILITY OF ANY INFORMATION OR SERVICE PROVIDED THROUGH THIS PLAN. THIS INFORMATION IS PROVIDED ON AN "AS IS" BASIS WITHOUT WARRANTIES OF ANY KIND, EITHER EXPRESS OR IMPLIED. ADDITIONALLY, THERE ARE NO WARRANTIES AS TO THE RESULTS OBTAINED FROM THE USE OF THIS INFORMATION. THIS DISCLAIMER OF LIABILITY APPLIES TO ANY DAMAGES OR INJURY TO PERSON OR PROPERTY CAUSED BY ANY FAILURE OF PERFORMANCE, ERROR, OMISSION, INACCURACY, INTERRUPTION, DELETION, DEFECT, DELAY IN OPERATION OR TRANSMISSION.**

## **HURRICANE PREPAREDNESS & PROTECTIVE ACTIONS**

When the next hurricane threatens, you must decide whether you will stay home, stay with friends or relatives in a safe place, relocate out of the area, or go to a public shelter. The most important thing you can do for yourself, your family, and your property is to make a HURRICANE PLAN, long before a storm threatens. The Forest is located in a Storm Surge Risk Category 1, and is less than 15 feet above sea level. There is a possibility that you will need to evacuate. You must have a hurricane survival kit (see Appendix F) with enough supplies to last you and your family at least three days. Even if you plan to evacuate, you need to have these supplies with you. Things don't always go as planned during a disaster. If you decide to leave the area, it is best to leave with ample time before the storm arrives. Expect roads to be congested after an evacuation is ordered. Complete The Disaster Checklist (Appendix E) to ensure you, your family, and home are prepared for a hurricane.

The following Watch or Warning will be issued by local authorities:

1. **Tropical Storm Watch** (tropical storm conditions with sustained winds from 39 to 74 mph are possible in The Forest within the next 36 hours):
2. **Tropical Storm Warning** (tropical storm conditions are expected in The Forest within the next 24 hours):
3. **Hurricane Watch** (hurricane conditions, sustained winds greater than 74 mph, are possible in The Forest within the next 36 hours):
4. **Hurricane Warning** (hurricane conditions are expected in The Forest within in 24 hours or less):

### **Before The Storm**

***When a Hurricane Watch Is Issued*** (Hurricane conditions are possible within the next 36 hours)

1. Clear your yard of potential flying debris
2. Prepare your swimming pool, by lowering the water level by one foot
3. Board up windows and other openings of your home.
4. Gas up your car and check the tires and fluids.
5. Get extra cash. Banks and ATM's won't function if power is lost.
6. Locate utility cut-off valves. If you are evacuating, turn them off.
7. Store plenty of water.
8. Turn your refrigerator to the coldest settings

***When a Hurricane Warning Is Issued*** (Hurricane conditions are expected in less than 24 hours)

1. Shutter and brace windows and doors immediately.
2. If you are ordered to evacuate, do so quickly.

### **If You Stay Home**

1. Designate a safe room in your home. It should be an interior room with no windows on the lowest level. Often a bathroom or large closet will be a good candidate.
2. Make sure you have your supply kit stocked ready and stored in your designated safe area.
3. Keep your family in one location.
4. Turn off your water at the main valve leading into your home. If public water or wells become contaminated, the water in your pipes and water heater will still be safe to drink.

### **During the Storm**

1. Stay indoors at all times.
2. Stay away from windows, even if they are shuttered.
3. Listen to your radio for the latest information on the storm.

4. If the eye of the hurricane passes right over you, it will become relatively calm. Stay inside! The other half of the storm will return at any minute.

### **Emergency Public Shelter Locations**

**See Appendix (D)** If you decide to go to a public shelter, REMEMBER, guns, pets and alcoholic beverages are not permitted. Bring everything else you will need including food, water, clothing, bedding and something to keep you occupied. Most of these items will already be in your hurricane survival kit. Be sure to place your kit in the car before going to the shelter. Pay close attention to local media outlets for information on which shelters have been opened. The following Emergency Shelters are the closest for Forest residents:

- Estero Recreation Center, 9200 Corkscrew Palms Blvd., Estero
- Alico Arena, 12181 FGCU Lake Pkwy Fort Myers
- Hertz Arena, 11000 Everblades Parkway, Estero
- South Fort Myers High School, 14020 Plantation Rd, Fort Myers

### **Evacuation Routes**

**See Appendix (D)**

### **Residential Re-entry Procedures**

Re-entry will be accomplished using current entry procedures of vehicle bar codes, authorized pass, or resident/guest look up in printed or computer files.

## **HAZARD ANALYSIS**

1. The Forest is vulnerable to: hurricanes, tornadoes, flooding, fires, and possible hazardous material incidents.
2. Site information is as follows:
  - Street **Map of The Forest (Phase & Condo Location)** see Appendix (G).
  - Number of residential units: Homes = 302, Condominiums = 487. (TOTAL = 789)
  - Estimated population of the residential community year-round: 1,000
  - Estimated maximum population of the residential community (season): 2,000
3. The Potential Storm Surge for The Forest is Category 1, from a land falling and exiting tropical storm or hurricane occurrence. See Appendix (D) for details.
4. The finished floor elevation (ffe) of the Main Gate is: 8 feet
5. As designated on the FEMA Flood Insurance Rate Map, The Forest is located in a flood zone A-14.
6. Due to the proximity of U.S. 41, The Forest is subject to possible hazardous material incidents from trucks transporting these items daily on the busy highway. An accident involving a truck carrying certain hazardous materials could result in a possible evacuation of The Forest.

## **CONCEPT OF OPERATIONS**

### **Management Structure**

The Property Manager is responsible for developing, implementing, and updating the residential emergency preparedness plan in accordance with the FPOA Board of Directors. In the absence of the Property Manager during an emergency, the implementation is to be executed by the FPOA Hurricane Committee Chair, FPOA President or Vice-President. The plan is to be updated or revised annually during March and April. Procedures to activate the emergency preparedness plan are as follows:

***Property Manager*** ensures the following when required to activate residential emergency preparedness plan due to storm or emergency conditions:

1. Alert residents and work sections as to what conditions exist and provide guidance as to what actions to take.
2. Ensure all FPOA computer files are backed up and a copy provided to each member of the FPOA Executive Committee. Place all important records in water-proof containers, and move to secure location.
3. Ensure all work sections and contractors secure all common property and building materials within The Forest (i.e. patio furniture, flags, gate arms, construction material etc.) to prevent flying debris from damaging other property.
4. Ensure security personnel are available to assist and enforce in the execution of emergency preparedness plan.

## **WHEN A WARNING IS ISSUED**

### **(Tropical Storm or Hurricane)**

**Residents**, stay near your television or radio and obey advisories promptly, and review the following:

#### ***If an Evacuation Has NOT Been Ordered:***

1. Collect your Family Disaster Supplies Kit, along with blankets and sleeping bags.
2. Call your emergency contact person to report your plans.
3. Keep children and pets indoors.
4. Make sure you have cash and your car has a full tank of gas in case you must evacuate.
5. Make sure a battery powered radio is nearby.
6. Make sure all windows are protected with shutters or plywood.
7. Store lightweight objects which could become missiles in high winds.
8. Anchor down objects that cannot be brought inside.
9. For drinking, fill food-grade containers with water from your tap and place them in the refrigerator.
10. For sanitary use, thoroughly clean the bathtub with bleach and fill with water.
11. Place all your valuables and records in a waterproof container and store on the highest floor of your home.

#### ***If An Evacuation Has Been Ordered or You Evacuate:***

1. Determine, to the best of your ability, if you can indeed reach your evacuation destination and leave in plenty of time to get there.
2. Turn off all your utilities, such as water and electricity.
3. Pack your Family Disaster Supplies Kit plus blankets and sleeping bags.
4. Take all important documents with you.
5. Call your emergency contact person and security to report your plans.
6. Lock the windows and doors of your home before leaving.
7. Tune your car radio to a news station to hear updates on evacuation routes.
8. Be sure to follow the recommended evacuation routes to avoid flooded roads and washed out bridges.
9. If you are headed for a shelter, make sure it is opened before leaving.

#### **Property Management / Gate Personnel:**

1. Post WARNING signs at all gates (entrance & exit) of condition in EFFECT.
2. Monitor weather radio for current and upcoming conditions.

3. Remove gate arms at Main Gate and Island Park Gate (entrance & exit), open gates at Island Park Gate for emergency vehicles (entrance & exit), turn off all power to gates, and remove American and Forest Flags at Main entrance.
4. If an evacuation order has been given by authorities, alert the community using FirstService Resident Alert and mass communication systems.
5. Continue video recording of all traffic (in-bound & out-bound) at Main Gate & Island Park as long as power remains on.
6. Process bar code entry report of last 14 days to determine what residents are most likely out of town at this time.
7. Check residents' homes (most likely out of town) for not stowed lawn furniture and flying debris (make record of findings).
8. Video record ALL common property within The Forest, to include construction sites. If construction site is deemed un-safe, contact contractor immediately for corrective action.
9. Ready generator and fuel for emergency operations should power be discontinued at Main Gate.
10. Secure gatehouse at the arrival of sustained wind speeds of 30 mph.

## **After The Storm**

### **Residents:**

1. Stay informed by listening to NOAA Weather Radio. Begin to move about very carefully and survey your situation. Please note: more people are killed and injured during the clean-up of a hurricane than during the storm itself.
2. If you have evacuated, do not attempt to return home until officials announce that it is safe.
3. Do not eat any food in damaged containers or in containers that have come in contact with flood waters. Check your refrigerator for spoilage. Do not use public water for cooking or drinking until you are notified it is safe.
4. Avoid traveling if at all possible. Roads may be damaged or washed out.
5. If phones are working, use them only for emergencies.
6. Do not stay in structures that are severely damaged or in danger of collapsing.
7. If your home has been spared, keep children and pets inside.
8. Watch for snakes and other animals forced into your home by flood waters.
9. Watch for downed power lines and give them a wide berth.
10. Notify your insurance agent. Things will go more smoothly if you have documentation, pictures and/or video to support your claims.

### **Property Management / Gate Personnel:**

1. Start normal security schedule manning gates and patrol.
2. Check roads for downed trees and power lines. Mark downed power lines with red cones and inform FP&L of downed line location. With assistance from Country Club Maintenance, and residents, have downed brush on roads cleared.
3. If power has been restored replace gate arms at main gate, and turn on power to Island Park gates.
4. Download recordings from gate house DVR's and retain for possible insurance or police review.
5. Video record community for possible insurance claims.
6. Assist with resident requests for information and provide any and all help, as possible.
7. If no severe damage is apparent in The Forest use normal challenge for entry. If damage is severe allow all food, water, and construction material entry without challenge. Allow contractor entry with previous contractor pass or bar code entry without challenge. Contractors without a previous pass MUST be challenged to protect residents from fraud and scams. If phones are not working, send patrol driver to resident's house to see if entry is OK.

## **INFORMATION, TRAINING AND EXERCISE**

**Identify and establish procedures for increasing resident and employee awareness of possible emergencies:**

- **Monthly information published in "Forest Matters" pertaining to Hurricane Preparedness & Protective Actions during Hurricane season.**
- **The placement of signs with red background, and BOLD yellow lettering at both entrance and exit gates. (Sample: "Hurricane Watch in Effect")**
- **Mass communication emails from the Property Manager.**
- **FirstService Resident Alerts by telephone and SMS.**

## Appendix (E)

# Disaster Checklist

---

### **Six Essentials to Keep Handy:**

- 1. Water**
- 2. Food**
- 3. First aid**
- 4. Clothing and Bedding**
- 5. Tools**
- 6. Emergency Supplies and Special Items.**

**Keep the items you will most likely need during an evacuation in an easy-to-carry container such as a large, covered trash container, camping backpack or duffel bag. Keep a smaller version of the disaster supplies kit in the trunk of your car.**

**\_\_\_\_\_ Water:** Water should be stored in durable plastic containers such as soft drink bottles. Avoid using containers that may decompose or break. Never ration water. Drink what you need and find more later. Change water supplies every six months. Store one gallon of water per person per day. Have purifying agents available.

**\_\_\_\_\_ Food:** Store at least a three day supply of non-perishable food for each person. Select foods that require no refrigeration, cooking or preparation. Select food items that are compact and lightweight and rotate the food supply every six months.

**\_\_\_\_\_ Sewer:** Your sewer system could be damaged in a disaster such as an earthquake, landslide or flood. Make sure the system is functioning as designed before using it to prevent contamination of your home and possibly the drinking water supply. Have a bucket or portable toilet available for disposing of human waste. Plastic bags placed in the toilet bowl will also work.

**\_\_\_\_\_ Electricity:** Locate your main electrical switch or fuse panel and learn how to turn the electrical power off. Remember, electrical sparks can cause a fire or explosion. If you are using a generator as a backup power supply remember to: Follow the generator manufacturer's instructions. Connect lights and appliances directly to the generator and not the electrical system. (Generators connected to a utility company's electrical system must be inspected by the utility and the state electrical inspector. Failure to have the system inspected may result in death or injury to utility crews trying to restore service to the area)

**\_\_\_\_\_ Water:** Label the water shut off valve and learn to turn off the water supply to your home. Identify the valve with a large tag. Ensure valve can be fully turned off. If the water valve requires the use of a special tool, make sure the tool is readily available. Shut off the main valve to prevent contamination of the water supply in your water heater and plumbing.

---

## Appendix (F)

# Hurricane/Disaster Survival Kit

This hurricane/disaster survival kit contains nearly everything you need to get through the storm. You can store most of these items in a large plastic container, but you may prefer to keep some items in the kitchen or garage until the storm approaches. Just be sure to have everything together and with you when the storm hits. The food in your pantry is of no use if your pantry is gone when the winds calm down!

### Family Disaster Supplies Kit

These contents can be assembled over a five month period on a weekly basis and perishable items should be changed or replaced every six months.

For more information on assembling and refreshing supplies, contact the [American Red Cross](#).

Be sure to develop a complete [Family Emergency Plan!](#)

<u>Essentials</u>	<u>Water</u>
<input type="checkbox"/> Battery-operated radio <input type="checkbox"/> Extra batteries <input type="checkbox"/> Flashlight <input type="checkbox"/> Do not include candles, which cause fires	<input type="checkbox"/> 3 gallons/person, minimum, in a food-grade, plastic container (Additional water for sanitation)

<u>Food</u>	
Minimum 3-day supply of non-perishable food that requires no refrigeration or preparation and little or no water.	
<input type="checkbox"/> Dry cereal <input type="checkbox"/> Canned juice <input type="checkbox"/> Canned vegetables <input type="checkbox"/> Ready-to-eat soups (not concentrated)	<input type="checkbox"/> Canned fruits <input type="checkbox"/> Peanut butter <input type="checkbox"/> Ready-to-eat canned meats <input type="checkbox"/> Quick energy snacks, graham crackers <input type="checkbox"/> Instant Coffee/Tea/Soft drinks/Juice/Dry Milk

<u>First Aid Kit</u> (one for your home and one for each car)	
<input type="checkbox"/> Scissors <input type="checkbox"/> Needle <input type="checkbox"/> Moistened towelettes <input type="checkbox"/> 2" sterile roller bandages (3 rolls) <input type="checkbox"/> Sterile adhesive bandages in sizes <input type="checkbox"/> Tweezers <input type="checkbox"/> Tongue blades (2) <input type="checkbox"/> 4" sterile gauze pads (4-6) <input type="checkbox"/> Tube of petroleum jelly or lubricant	<input type="checkbox"/> Thermometer <input type="checkbox"/> Latex gloves (2 pairs) <input type="checkbox"/> 2" sterile gauze pads (4-6) <input type="checkbox"/> Triangular bandages (3) <input type="checkbox"/> Sun screen <input type="checkbox"/> Cleansing agent/soap <input type="checkbox"/> Assorted sizes of safety pins <input type="checkbox"/> 3" sterile roller bandages (3 rolls) <input type="checkbox"/>

## Non-Prescription Drugs

Laxative  
 Antacid (for stomach upset)  
 Anti-diarrhea medication

Activated Charcoal  
 Aspirin or non-aspirin pain reliever  
 Syrup of Ipecac (use to induce vomiting )

## Tools and Supplies

Crowbar  
 Medicine dropper  
 Assorted nails, wood screws  
 Cash or traveler's checks, change  
 Tape, duct and plumber's tape  
 Whistle  
 Plastic sheeting  
 Matches in a waterproof container  
 Heavy cotton or hemp rope  
 Paper cups, plates and plastic utensils  
 Aluminum foil  
 Matches / Lighter

Paper, pencil  
 Signal flare  
 Plastic storage containers  
 Non-electric can opener, utility knife  
 Shut-off wrench, for household gas/water  
 Compass  
 Needles, thread  
 Pliers, screwdriver, hammer  
 Map of the area (for locating shelters)  
 Patch kit and can of seal-in-air for tires  
 Camp Stove, Grill (with fuel)  
 Coolers for food storage / ice

## Sanitation

Disinfectant  
 Feminine supplies  
 Household chlorine bleach  
 Plastic bucket with tight lid

Soap, liquid detergent  
 Toilet paper, towelettes, paper towels  
 Personal hygiene items  
 Plastic garbage bags, ties (for sanitation use)

## Clothing and Bedding

Sunglasses  
 Blankets or sleeping bags  
 Sturdy shoes or work boots  
 One complete change of clothing and footwear per person

Hat and gloves  
 Rain gear  
 Thermal underwear

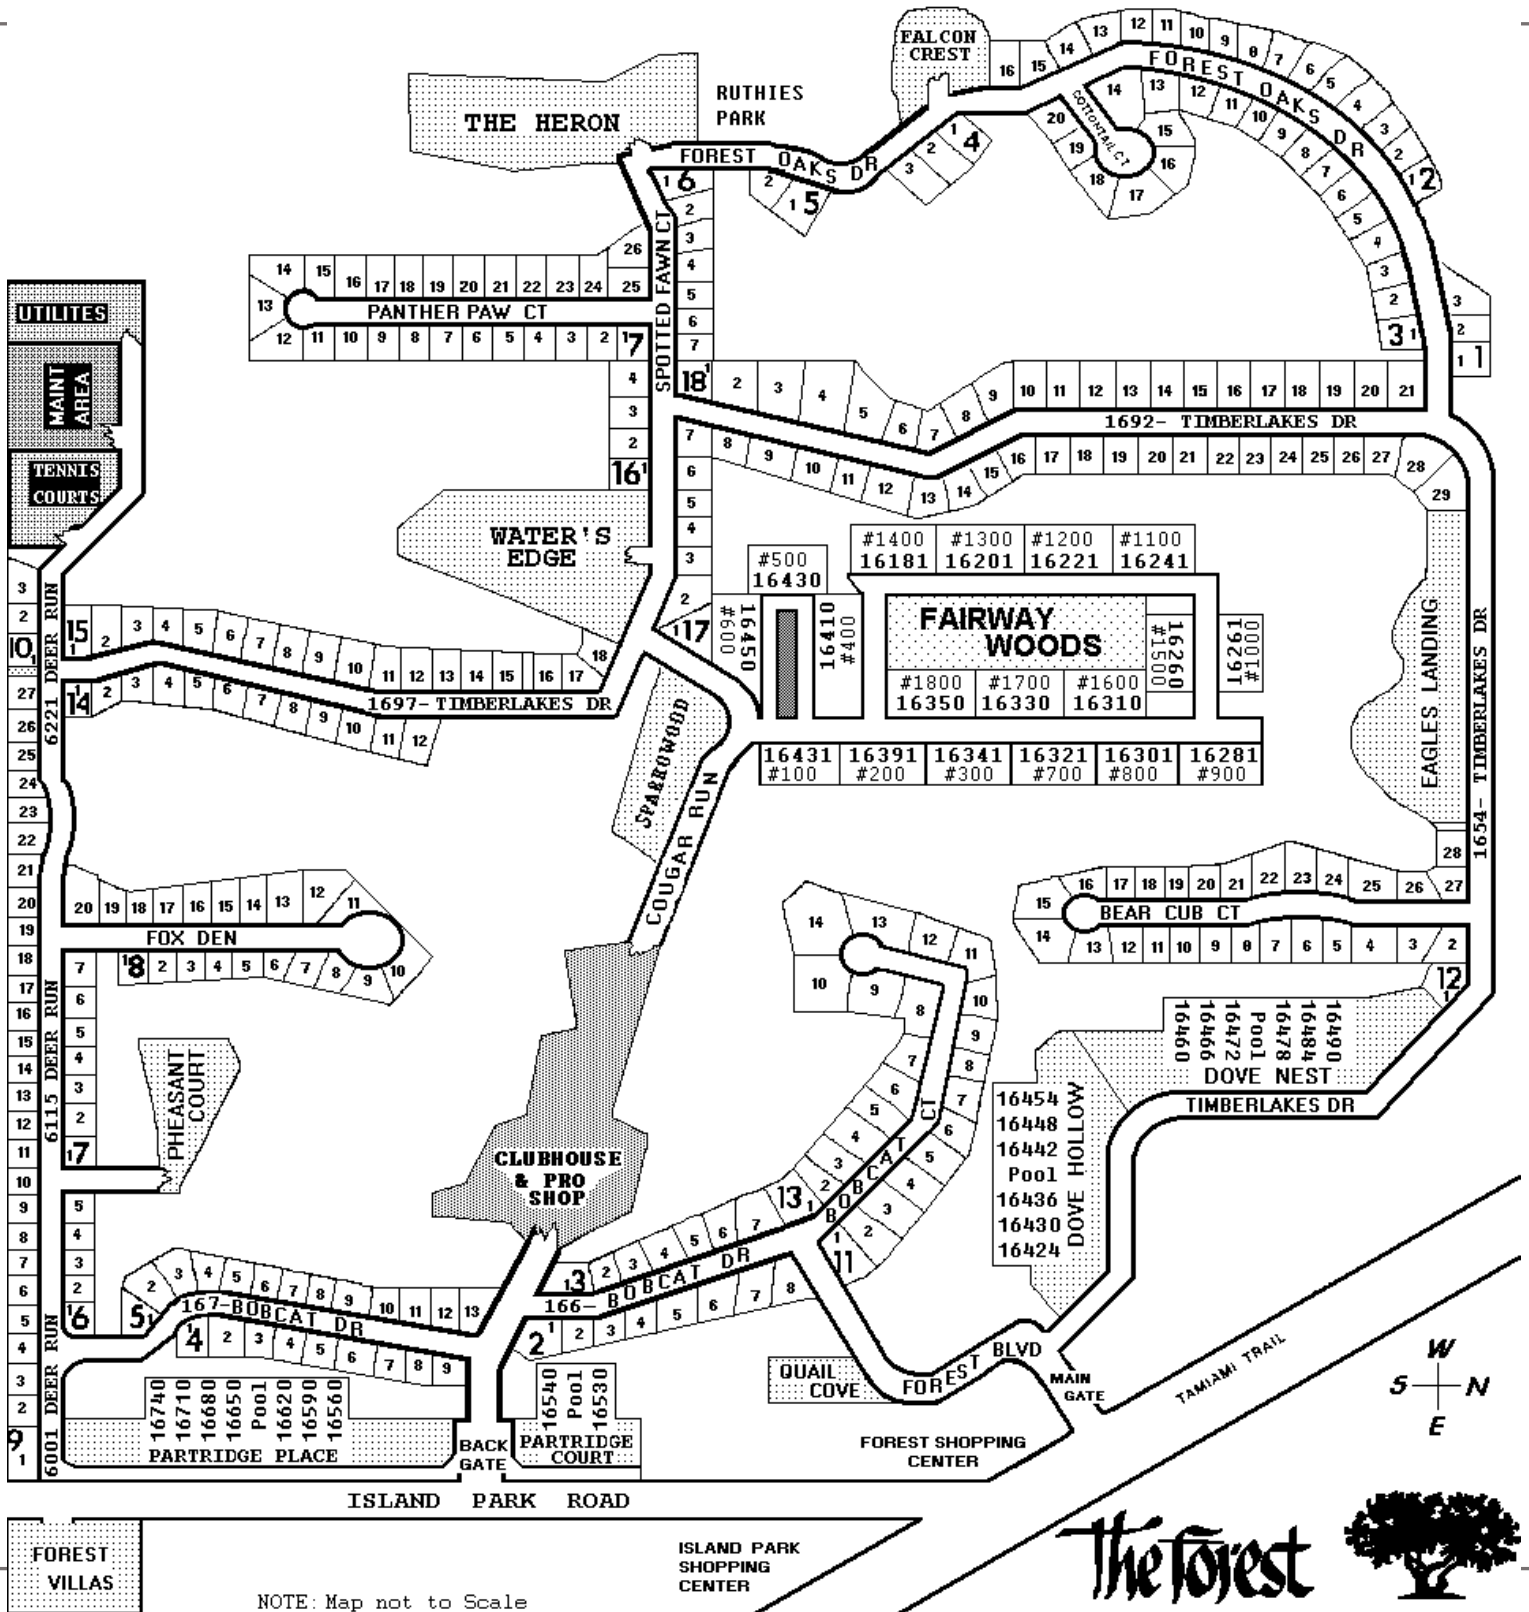

## For Baby

Formula  
 Powdered milk  
 Medication  
 Bottles  
 Diapers

## For Pets

Food  
 Leash, harness or carrier  
 Records of vaccinations  
 Non-tippable food and water containers

# Appendix (G)

NOTE: Map not to Scale
