Patient Information and Consent Sheet Regarding Chronic Care Management (CCM)

For Medicare payment purposes, the Centers for Medicare & Medicaid Services (CMS) has decided that CCM is for patients with multiple (two or more) chronic conditions expected to last at least 12 months, or until the death of the patient, that place the patient at significant risk of acute exacerbation/decompensation, functional decline, or death.

PCAIMA will be following CMS guidelines starting January 1, 2015, and will submit claims to Medicare for such non face-to-face Chronic Care Management (CCM), of Medicare patients that require non face-to-face services between their scheduled office visits at PCAIMA for issues such as medication management, medical concerns, and triage and management of phone-based issues that might occur anytime over a 24 hours per day basis. Your face-to-face visits for evaluation and management in our office are still necessary and recommended to provide best care and to remain a patient in our practice.

You may contact Medicare for further information about Chronic Care Management (CCM).
