

# Vinta-Zyme Manual

## Enzymatic detergent for manual cleaning

### Product Description

Vinta-Zyme manual is a low foaming enzymatic detergent designed to enhance the manual cleaning process. It can be widely used for the manual cleaning of items such as surgical grade instruments, reusable items, endoscopes and other medical devices. Vinta-Zyme manual is a blend of five (5) enzymes that are effective in the removal of all protein, blood, fatty tissues, starches, etc. from all medical instruments, equipment, and supplies.

Specially formulated to solubilize and remove all bio-burden with a mixture of surfactants.

#### Applications

- Surgical instruments, endoscopes, medical devices
- Safe on: stainless steel, aluminum, anodized aluminum, titanium, brass, copper, common plastics

#### Advantages

- Multi-enzyme formula
- Works fast
- Safe to use
- Enhances manual cleaning
- Surfactants remove bioburden efficiently

#### Instructions for Use

1. Add 1/2 to 1 oz per gallon (4 to 8 ml/L) of water
2. For best results, ensure water temperature is 80-110°F (26-44°C). Do not exceed 140°F (60°C)
3. Soak and clean instruments according to hospital protocol
4. Rinse thoroughly

#### Technical Data

- pH neutral
- Bio-degradable
- Non-toxic
- Contains corrosion inhibitors
- Low foaming
- Gentle on instruments

#### Common Packaging

- 4 – 1 Gallon Bottles
- 2 – 2.5 Gallon Pails
- 5 Gallon Pails
- 30 Gallon Drums
- 55 Gallon Drums
